

≡ YOUR AUTOMATIC BARRIER ≡

TEMPOBAR[®]

AN AUTOMATIC NON-ELECTRIC BARRIER with delayed automatic closing

- > *The TEMPOBAR[®] opens and closes without having to get off your horse or out of your vehicle.*
- > *Automatic closing is delayed and slowed to allow the passing of several riders or a vehicle with a trailer.*
- > *It can be fitted anywhere as it needs no electricity supply.*

EQUESTRIAN INNOVATIONS

Jean-Luc Fautras, after many patented inventions to improve the security and health of horses and their riders in transport, stables and jumping, presents the automatic barrier TEMPOBAR®.

ECONOMICAL

- > Does not require any electrical installation.
- > Quick installation.

PRACTICAL

- > Opening the barrier can be done while on horseback:
 - by pulling the handle attached to the closing bar
 - or by pulling the handle attached to a wire that allows you to act from a distance.
- > The TEMPOBAR® can be covered in wood or stone to fit into the environment that it's destined for.

HANDLE CONNECTED TO A CABLE

HANDLE CONNECTED TO THE BAR

SECURE

- > It doesn't replace a gate but secures a place where horses could escape. The entrance to a paddock, manège, path...
- > The combination of 2 bars allows you to secure a paddock or path while enabling opening from a vehicle going in or out.
- > To use to close a paddock, it is possible to connect an electric fence on the closing bar using insulators.
